

TRACKWAY

TACTICAL MOBILITY SOLUTIONS

TACTICAL MOBILITY SOLUTIONS

FAUN TRACKWAY is the innovative solution for the ground mobility of vehicles and aircraft. **TRACKWAY** is temporary roadway system providing an effective solution over soft, muddy, marshy, snowy, beach or desert terrain. It can also provide access to bridgeheads and aircraft recovery. The product was designed and developed for the MOD and

has been used by the British Army, Royal Navy, Royal Air Force and by over 30 armed forces worldwide.

FAUN is a German family owned business part of the **KIRCHHOFF** Group. **FAUN** have supplied tank bridges, floating bridges, assault boats, motor torpedo boats, rocket propelled anchors, decompression chambers and ground mobility systems.

RRR

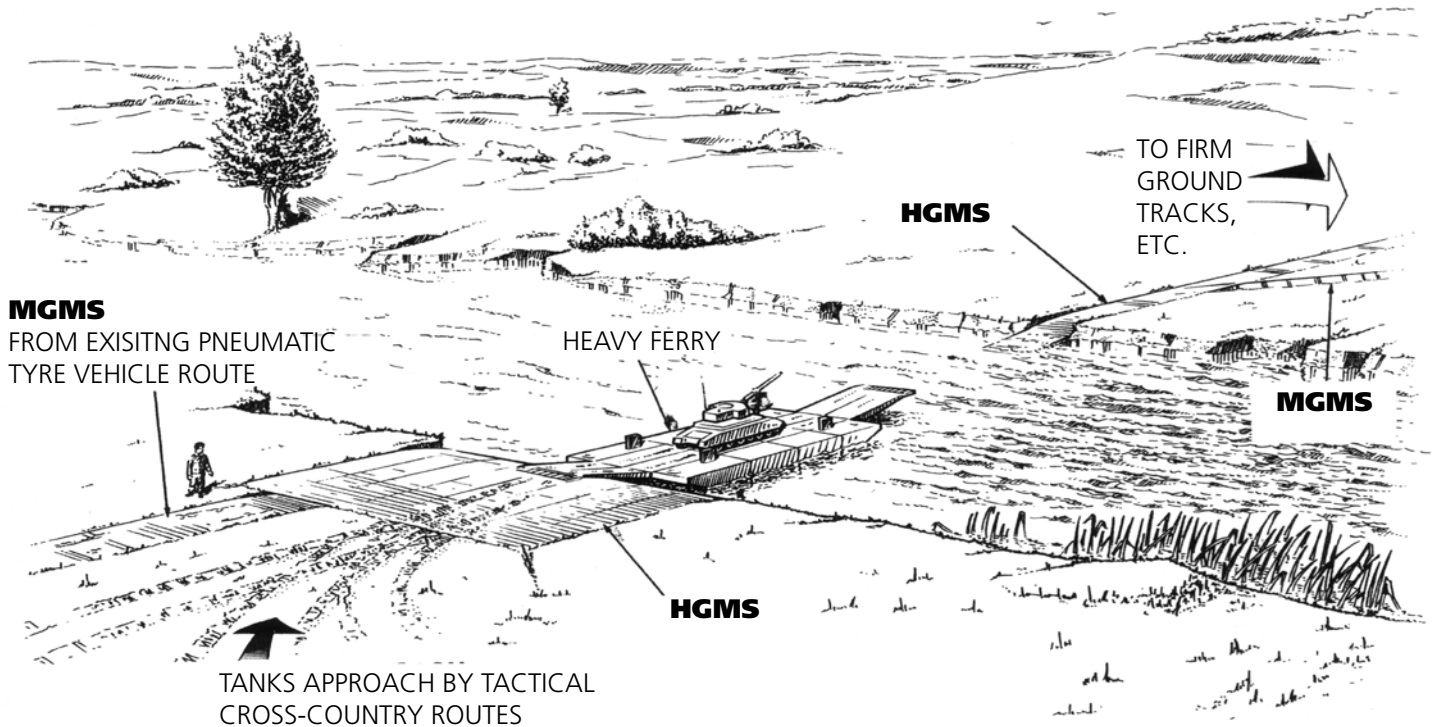

- FAUN's **R**apid **R**unway **R**epair system
- RRR utilises modular aluminium mats
- Providing temporary repair to airfields
- Flying operations can be resumed very quickly
- For repair following an enemy attack or natural disaster
- Quickly providing a minimum operating strip
- For temporary taxiways and aircraft hard standing
- Recovering aircraft when it has overshot a runway
- An effective solution for helicopter landing pads
- 11m x 16m mat is NATO codified

ALM

- FAUN's **A**ircraft **L**anding **M**at system
- ALM is a modular airfield system
- Utilising modular aluminium panels
- Providing temporary airfield operations
- For strategic operations or following a natural disaster
- Flying operations can be established very quickly
- Providing temporary airfields in a variety of environments
- For taxiways and aircraft hard standing
- Can provide temporary helicopter landing pads
- VTOL engine test pads

TRACKWAY

HGMS

- FAUN's **H**eavy **G**round **M**obility **S**ystem
- HGMS is a modular roadway system MLC 70
- Providing temporary access over demanding terrain
- Suitable for tanks and heavy tracked vehicles
- TRACKWAY is the aluminium panels that make up the roadway
- TRACKRACK is the launch and recovery system
- SPOOLRACK provides additional roads lengths for the TRACKRACK
- Deploying very quickly and efficiently
- 50m of roadway can be deployed in less than 10 mins
- NATO codified

MGMS

- FAUN's **M**edium **G**round **M**obility **S**ystem
- MGMS is a modular roadway system MLC 30
- Providing temporary access over a variety of terrain
- Suitable for vehicles with pneumatic tyres
- TRACKWAY is the aluminium panels that make up the roadway
- FASTRACK is the launch and recovery system for the TRACKWAY
- Chassis/flatbed mounted onto a wide variety of vehicles
- Optional ISO668 Twistlocks for removal by crane
- 3.3m of roadway can be deployed in less than 10 mins
- NATO codified

HLM

- FAUN's **H**elicopter **L**anding **M**at
- HLM is a modular helicopter pad system
- Utilising modular aluminium panels
- Providing temporary helicopter operations
- Suitable for use in a variety of environments
- For leisure use by hotels and event organisers
- Provides logistical support onto a variety of terrain

PRODUCT DEVELOPMENT

FAUN maintains a large engineering design and research team. The team is working on a number of projects to supply quality tactical mobility solutions around the world.

The design and research team works in co-operation with armed forces globally to provide ground mobility systems to meet the required design and operational standards.

Providing military equipment for the UK and world markets for over 40 years, TRACKWAY has been used by the British Army, Royal Navy, Royal Air Force and also worldwide by over 30 armed forces.

FAUN welcomes enquires to design and develop new products for military or civil use.
